

CTVK SUPPLY AIR VALVE

Air Management & ATDs

Introduction

Design valve for wall mounting

- Low noise level
- Draught free air supply
- Easy to install

Product details

Product Code: CTVK

The CTVK is a very quiet supply air valve designed for wall mounting. The valve is suitable for use in small premises, such as offices, houses and hotel rooms. The air discharged from the valve is mixed thoroughly with the room air thus providing a draught-free air supply. The air flow is adjustable. The design of the CTVK minimizes the risk of dust deposits forming on the wall surface. The valve is easy to install and easy to keep clean since it has large, smooth surfaces.
