

IRIS DAMPER

Air Management & ATDs

Introduction

The original damper, developed and designed by Fläkt Woods available up to size 800 mm

- Low noise level
- Regulation plates form a virtually ideal measuring orifice which enables an easy and reliable measurement of the air flow
- Fully openable for cleaning of duct

Product details

Product Code: IRIS

Ideal solution for the exact and quick air flow measuring and regulation. Composed of regulation plates, regulating nut or handle and regulation scale. Regulation plates form a virtually ideal measuring orifice which enables an easy and reliable measurement of the air flow. Because of its acid-proof material, IRIS-aaa-H is best suited for premises where acid-proof ducts are used .

Fast Facts

- Several sizes: Ø 80 – 800 mm
- Composed of regulation plates, regulating nut or handle (size 80) and regulation scale
- Operation independent of flow direction
- Air tight, tightness class C
- Acid-proof material available, best suited for premises where acid-proof ducts are used
- Secured to the ducting with rivets
- The joining collars are supplied with rubber sealing gasket
